Module Overview

Teaching Team

Richard Davies

Lecturer

rj.davies@ulster.ac.uk

Dr George Moore

Senior Lecturer

g.moore@ulster.ac.uk

What is Software Product and Process Management?

- Team Project - 5 members
- Agile Scrum planning of an MVP - Structured practice
- Apply learning from other modules
  - Year 1
    - COM102 (CS/SE) - Programming II - Java
    - COM122 (CT) - Programming II - C#
    - COM149 (IC) - Programming II - Javascript
  - Year 2
    - **COM410 - Programming in Practice - CS,CT & IC - S1**
    - **COM498 - Algorithms & Data Structures - SE**
    - COM431 - Server Side Development - CS, SE, CT & IC - S2

What is Software Product and Process Management?

- Opportunity to develop professional practice
- Freedom to work on something bigger
- Opportunity to create and plan an web-based MVP
- Room to refine, evolve, review your work
- Space to teamwork constructively / professionally
- Potential to enhance your employability

- Hard work
  - Continuous application of knowledge (practice) and team working (communication)

Why now?

- Exploit your learning so far
- Reflect on your own learning within team setting
- **<u>Enhance employability for placement and beyond</u>**
- Help towards further understanding on planning out your final year project

What you have to do individually

- Want to learn and develop your professional practice
- Engage actively, enthusiastically, continuously and professionally
- Attend all timetabled sessions and take part
- Manage your time
- Work in a team
  - Communicate better
  - Improve leadership
  - Resolve conflicts
  - Create solutions
- Meet all deadlines
- Extend yourself and those around you

What we do

- Mentor teams
- Facilitate the Agile process
  - Highly structured
- Guide & advise teams
- Set the challenge
- Assess

- When absolutely necessary, control and resolve issues

Module Logistics

Timetable

- Lectures
  - Introduce new concepts and topics
  - Provide examples and relevant context
- Labs
  - Work on weekly tasks
  - Discuss team progress
  - Iterate your MVP
  - Opportunity to ask us questions

Timetable

Software Product and Process Management - Semester 1 Timetable

Team Logistics

- Working in teams of 5
  - 48 teams
- Team membership is assigned by the teaching staff
  - Balanced teams across cohorts (CS/SE/IC/CT)
- Team 1-15 in Lab A (09:15 to 12:05) - **BC-03-311**
- Team 16-24 in Lab A (09:15 to 12:05) - **BC-03-305**
- Team 25-39 in Lab B (12:15 to 15:05) - **BC-03-311**
- Team 40-48 in Lab B (12:15 to 15:05) - **BC-03-305**

Blackboard Ultra

- COM435(65610) - Software Product and Process Management
- Announcements
- Module Information
- Assessment and Feedback
- Lecture materials
  - Content by week

Assessment

Important Dates and information

CW1 - Software Product Planning Assignment

- Assignment is weighted at *60%* of module marks.
- **Needs and Risk Assessment** stage due *Friday 15 November 2024 by noon.*
- **Minimum Viable Product and Sprint Plan** stage due *Friday 06 December 2024 by noon.*

Week 8

Week 11

CW2 - Theory Test

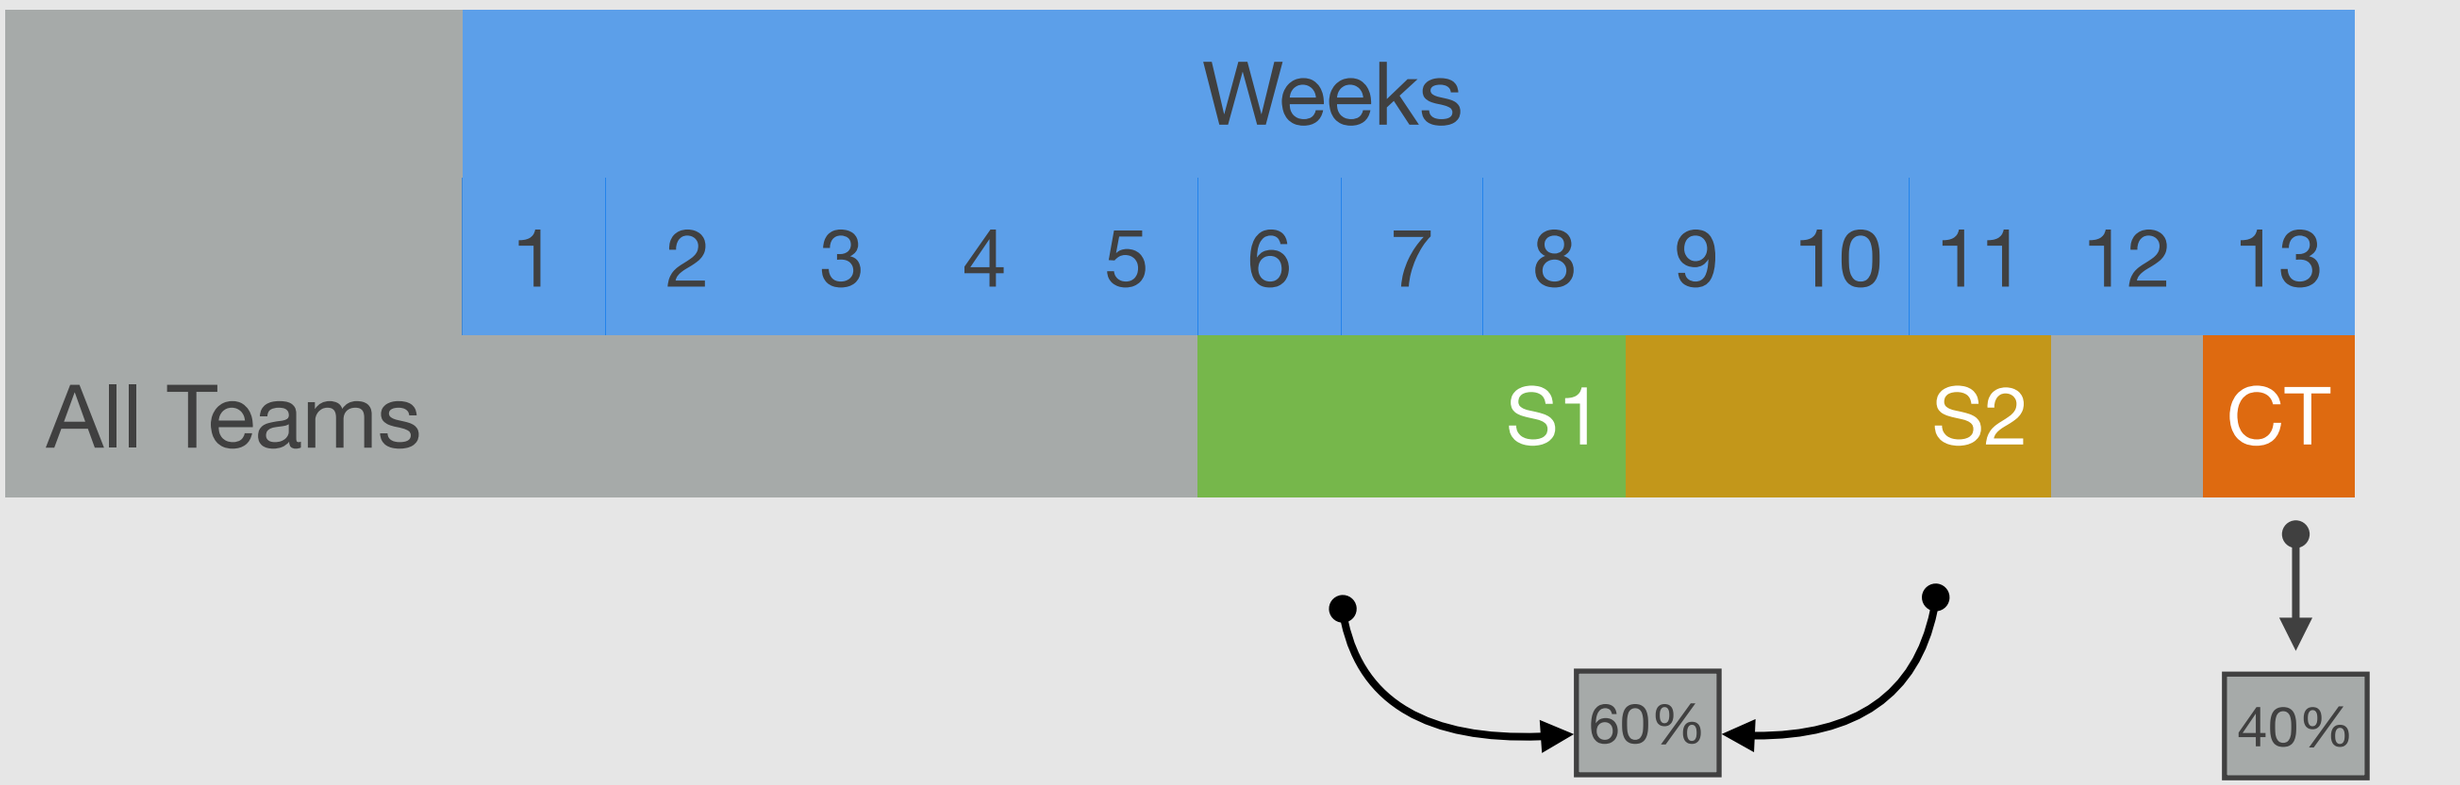
- Class test is weighted at 40% of module marks.
- Class test takes place during timetabled lab sessions on 10 January 2025, precise details will be communicated in advance.
- 90 minutes in duration

Week 13

10 Jan 2025

In Labs

Assessment Schedule

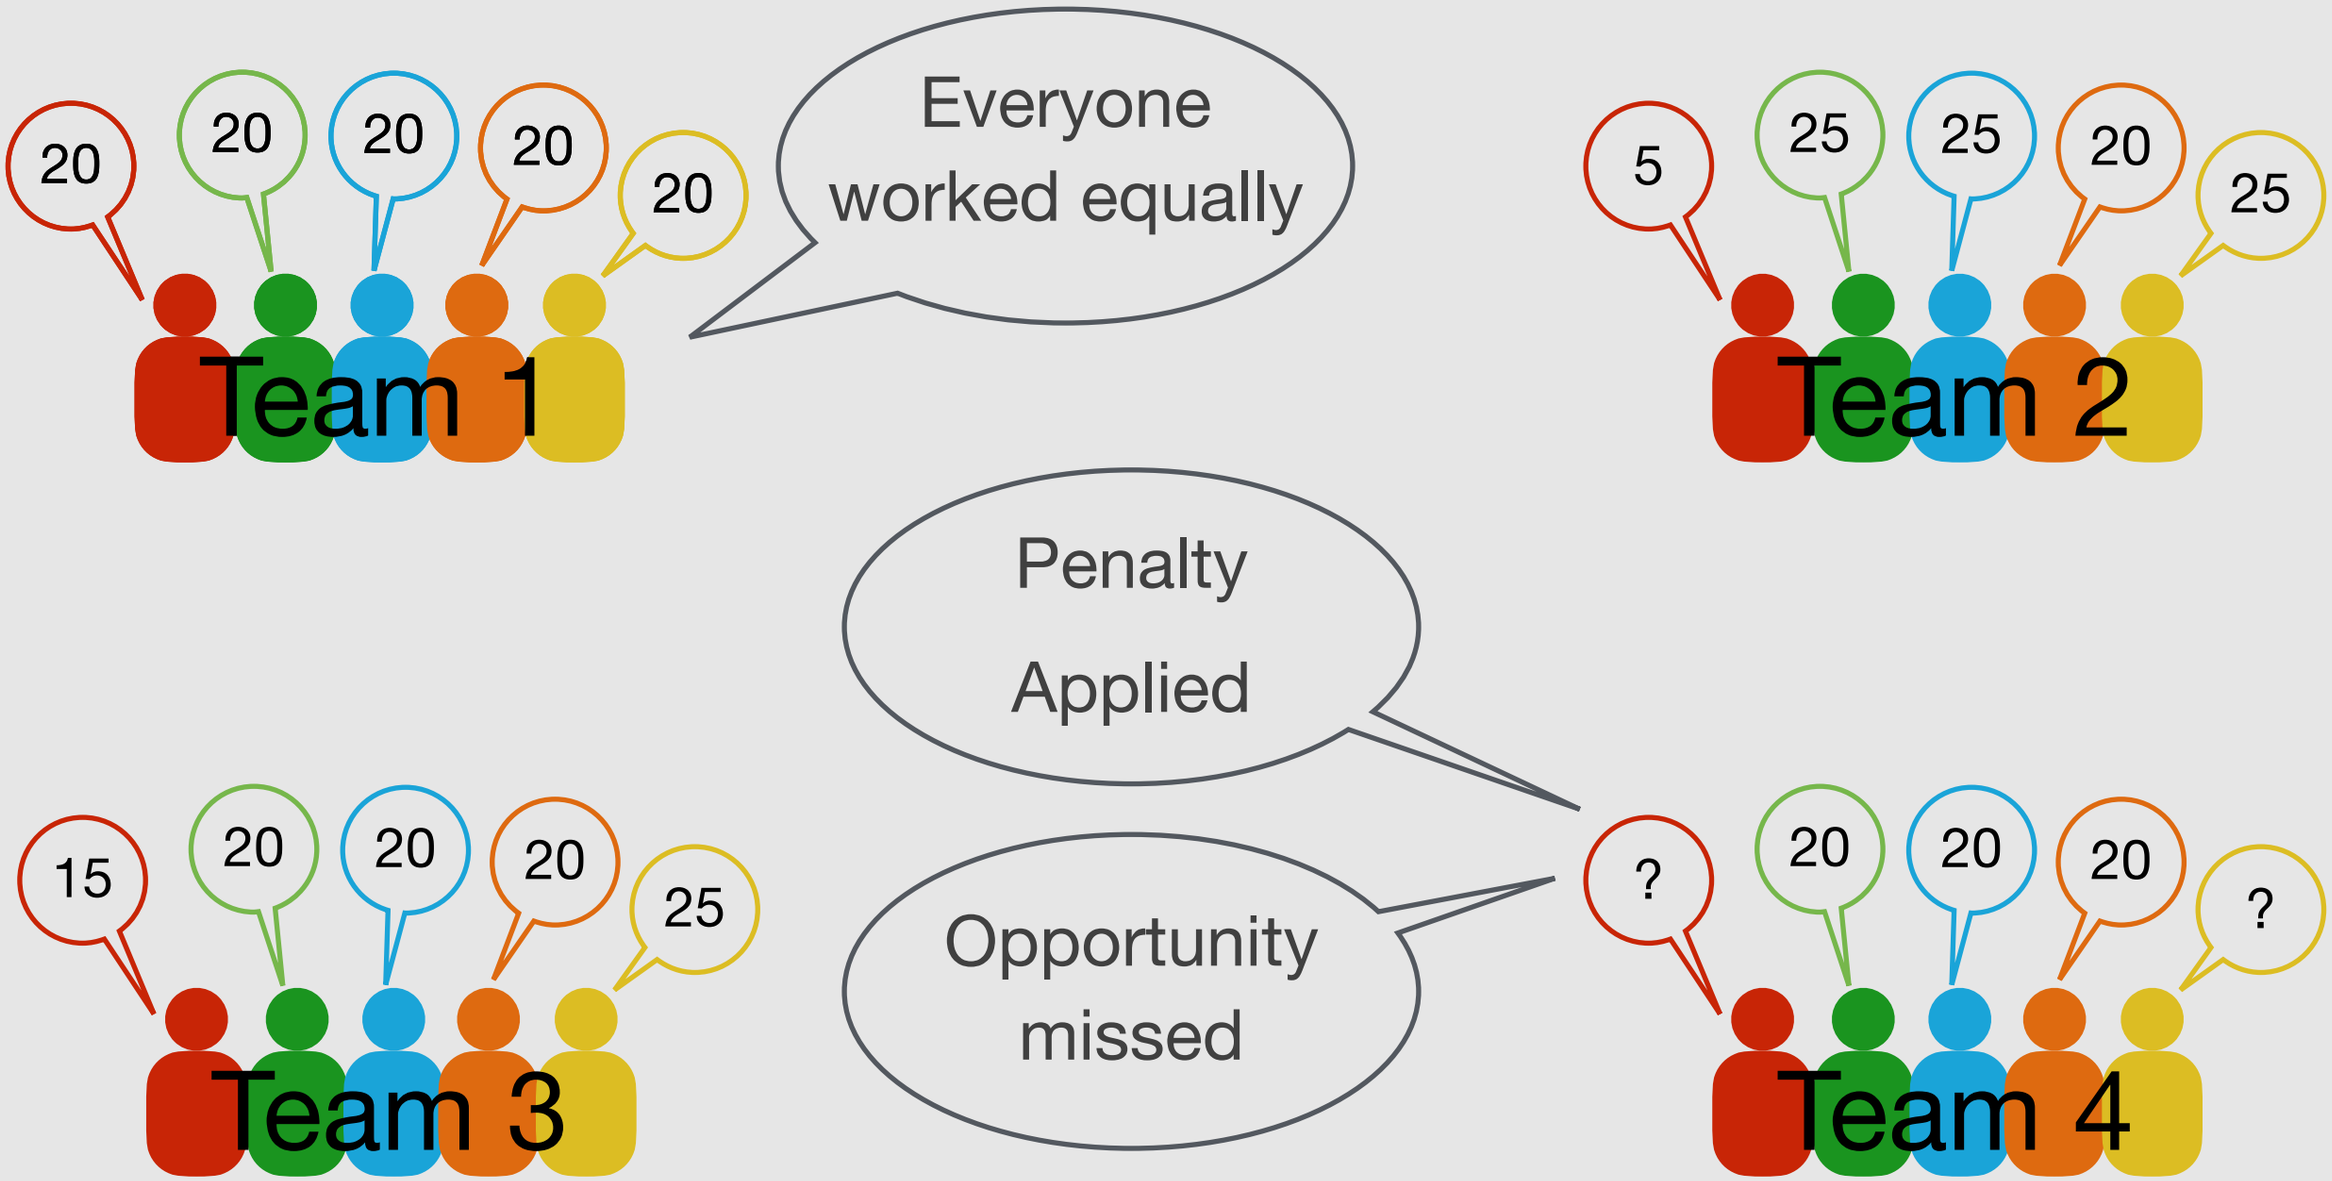


Class Test

S1 - Needs and Risk Assessment

S2 - MVP and Sprint Planning

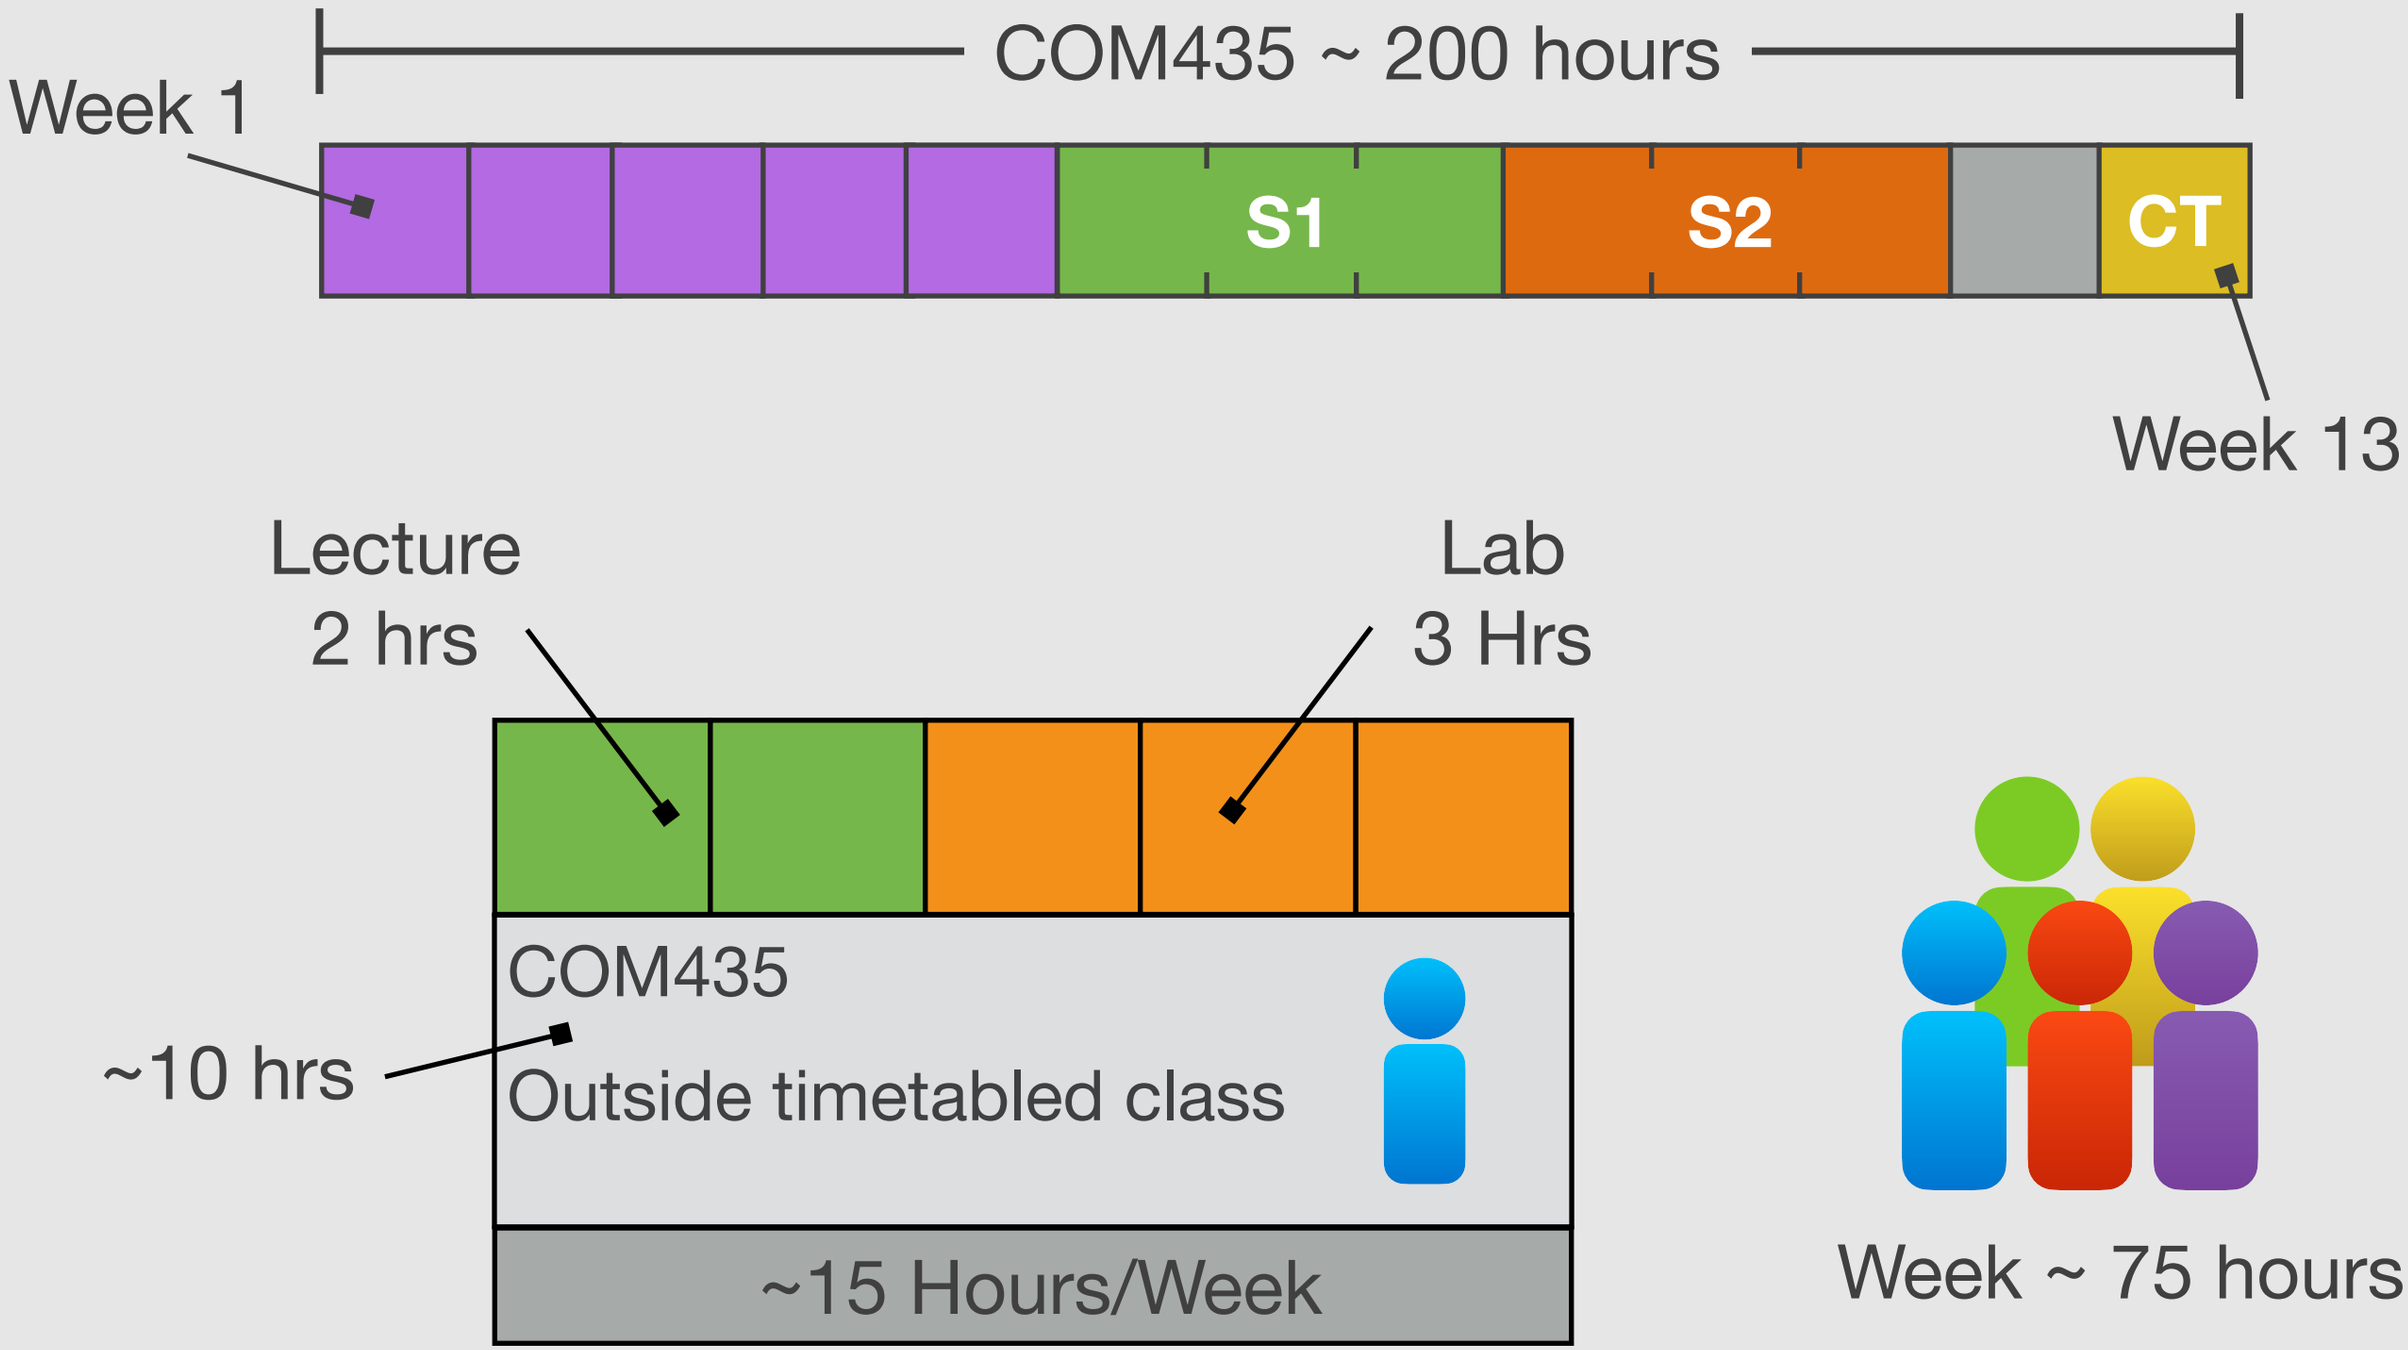
Self & Peer Assessment



Workload

- Quite a few deliverables
- Agile sprints are representative of working in a company
- No time for coasting
- Everyone must play their part, and well

Expectation



Assignment

Module Learning / Challenge

- Evolve the planning of a MVP
- Process - managed using Agile Scrum
  - Value Proposition Canvas
  - Epics, Features, User stories, Tasks, Tests
  - Product Backlog
  - Story Map
  - Sprint planning

Website Challenge

Application Definition Statement

An online driving school for learner drivers and their instructors

- Users
  - Learner drivers
  - Driving instructions
  - Driving centres

Example User Stories

- As a driving instructor I want to provide lessons to learners near me so I can save money on fuel.

- As a learner driver I want to find the best driving instructor in my area so I can pass my test on the first attempt.

Website Challenge

Application Definition Statement

A hassle free online music tutoring service for budding musicians

- Users
  - Tutors
  - Music students
  - Parents

Example User Stories

- As a user I want to pay online because it’s secure and convenient.
- As a parent I want to pay online using Google pay because I use the Google eco system
- As a parent I want to be able to pay via Google Pay on a mobile phone for any outstanding lesson invoices because I want to save time on the go.

Website Challenge

Application Definition Statement

A free online primary school management service for parents

- Users
  - Parents
  - Teachers

Example User Stories

- As a parent I want to cancel after school activities for my child as sometimes our schedule changes last minute.
- As a canteen chef I want to check which pupils are booked into breakfast club so I can prepare resources in the morning.

Questions?

- Any questions on CW:
  - Discuss at during labs with your Team
  - Add to your Teams channel
  - Major concerns - speak to a MC or demonstrator

Lab - Week 1

Task 1

- Organise yourselves into your assigned Teams
  - Find out what team your in by checking Blackboard Ultra Teams
  - Find out what lab room you should be meeting in
  - Meet you team
