Prioritising User Stories - MoSCoW

A technique used to reach a common understanding between the development team and stakeholders, for example the product owner and the cross functional team.

MUST are features that must be included before the product can be launched. It is good to have clarity on this before a project begins, as this is the minimum scope for the product to be useful.

SHOULD are features that are not critical to launch, but are considered to be important and high value to the user.

COULD are features that are nice to have and could potentially be included without incurring too much effort or cost. These will be the first features to be removed from the scope if the project's timescales are later at risk.

WON'T are features that have been requested but are explicitly excluded from the scope for the planned duration, and may be included in a future phase of development.

Team Retrospectives - Work Flow

- Add cards - include names on cards (3 minutes)
  - Post it notes
- Thumbs up/down for more time
  - Quick, effective, democratic
- Read **all** cards aloud
  - No conversation
  - Only explanation
  - Seek clarification if needed
- Vote on cards (2 minutes)
- Discuss top cards
- Drive Action points

Is xyz the type of businesss we even want to be in?

Does the business know we spent an agonising amount of time on xyz? Was it worth it?

XYZ recurring meeting feels like a waste of time!

This is taking longer than we thought is there an API that we could use to help speed things up?

Jessica Barnett - **https://tinyurl.com/jd8o2sp**

Team Retrospectives Lists

- **Went Well**: for positive things we want to celebrate, people we want to thank or recognise, parts of our process we appreciate, etc.
- **Needs to Change**: for things that people think we should change, improve, stop doing, complaints, etc.
- **Questions & Discussion**: for anything else people want to talk about that don’t fit well inside the other two.
- **Action Items**: where cards are moved as they are discussed and action items are decided and assigned.
