

# Value Proposition

What for who and why

# Canvases

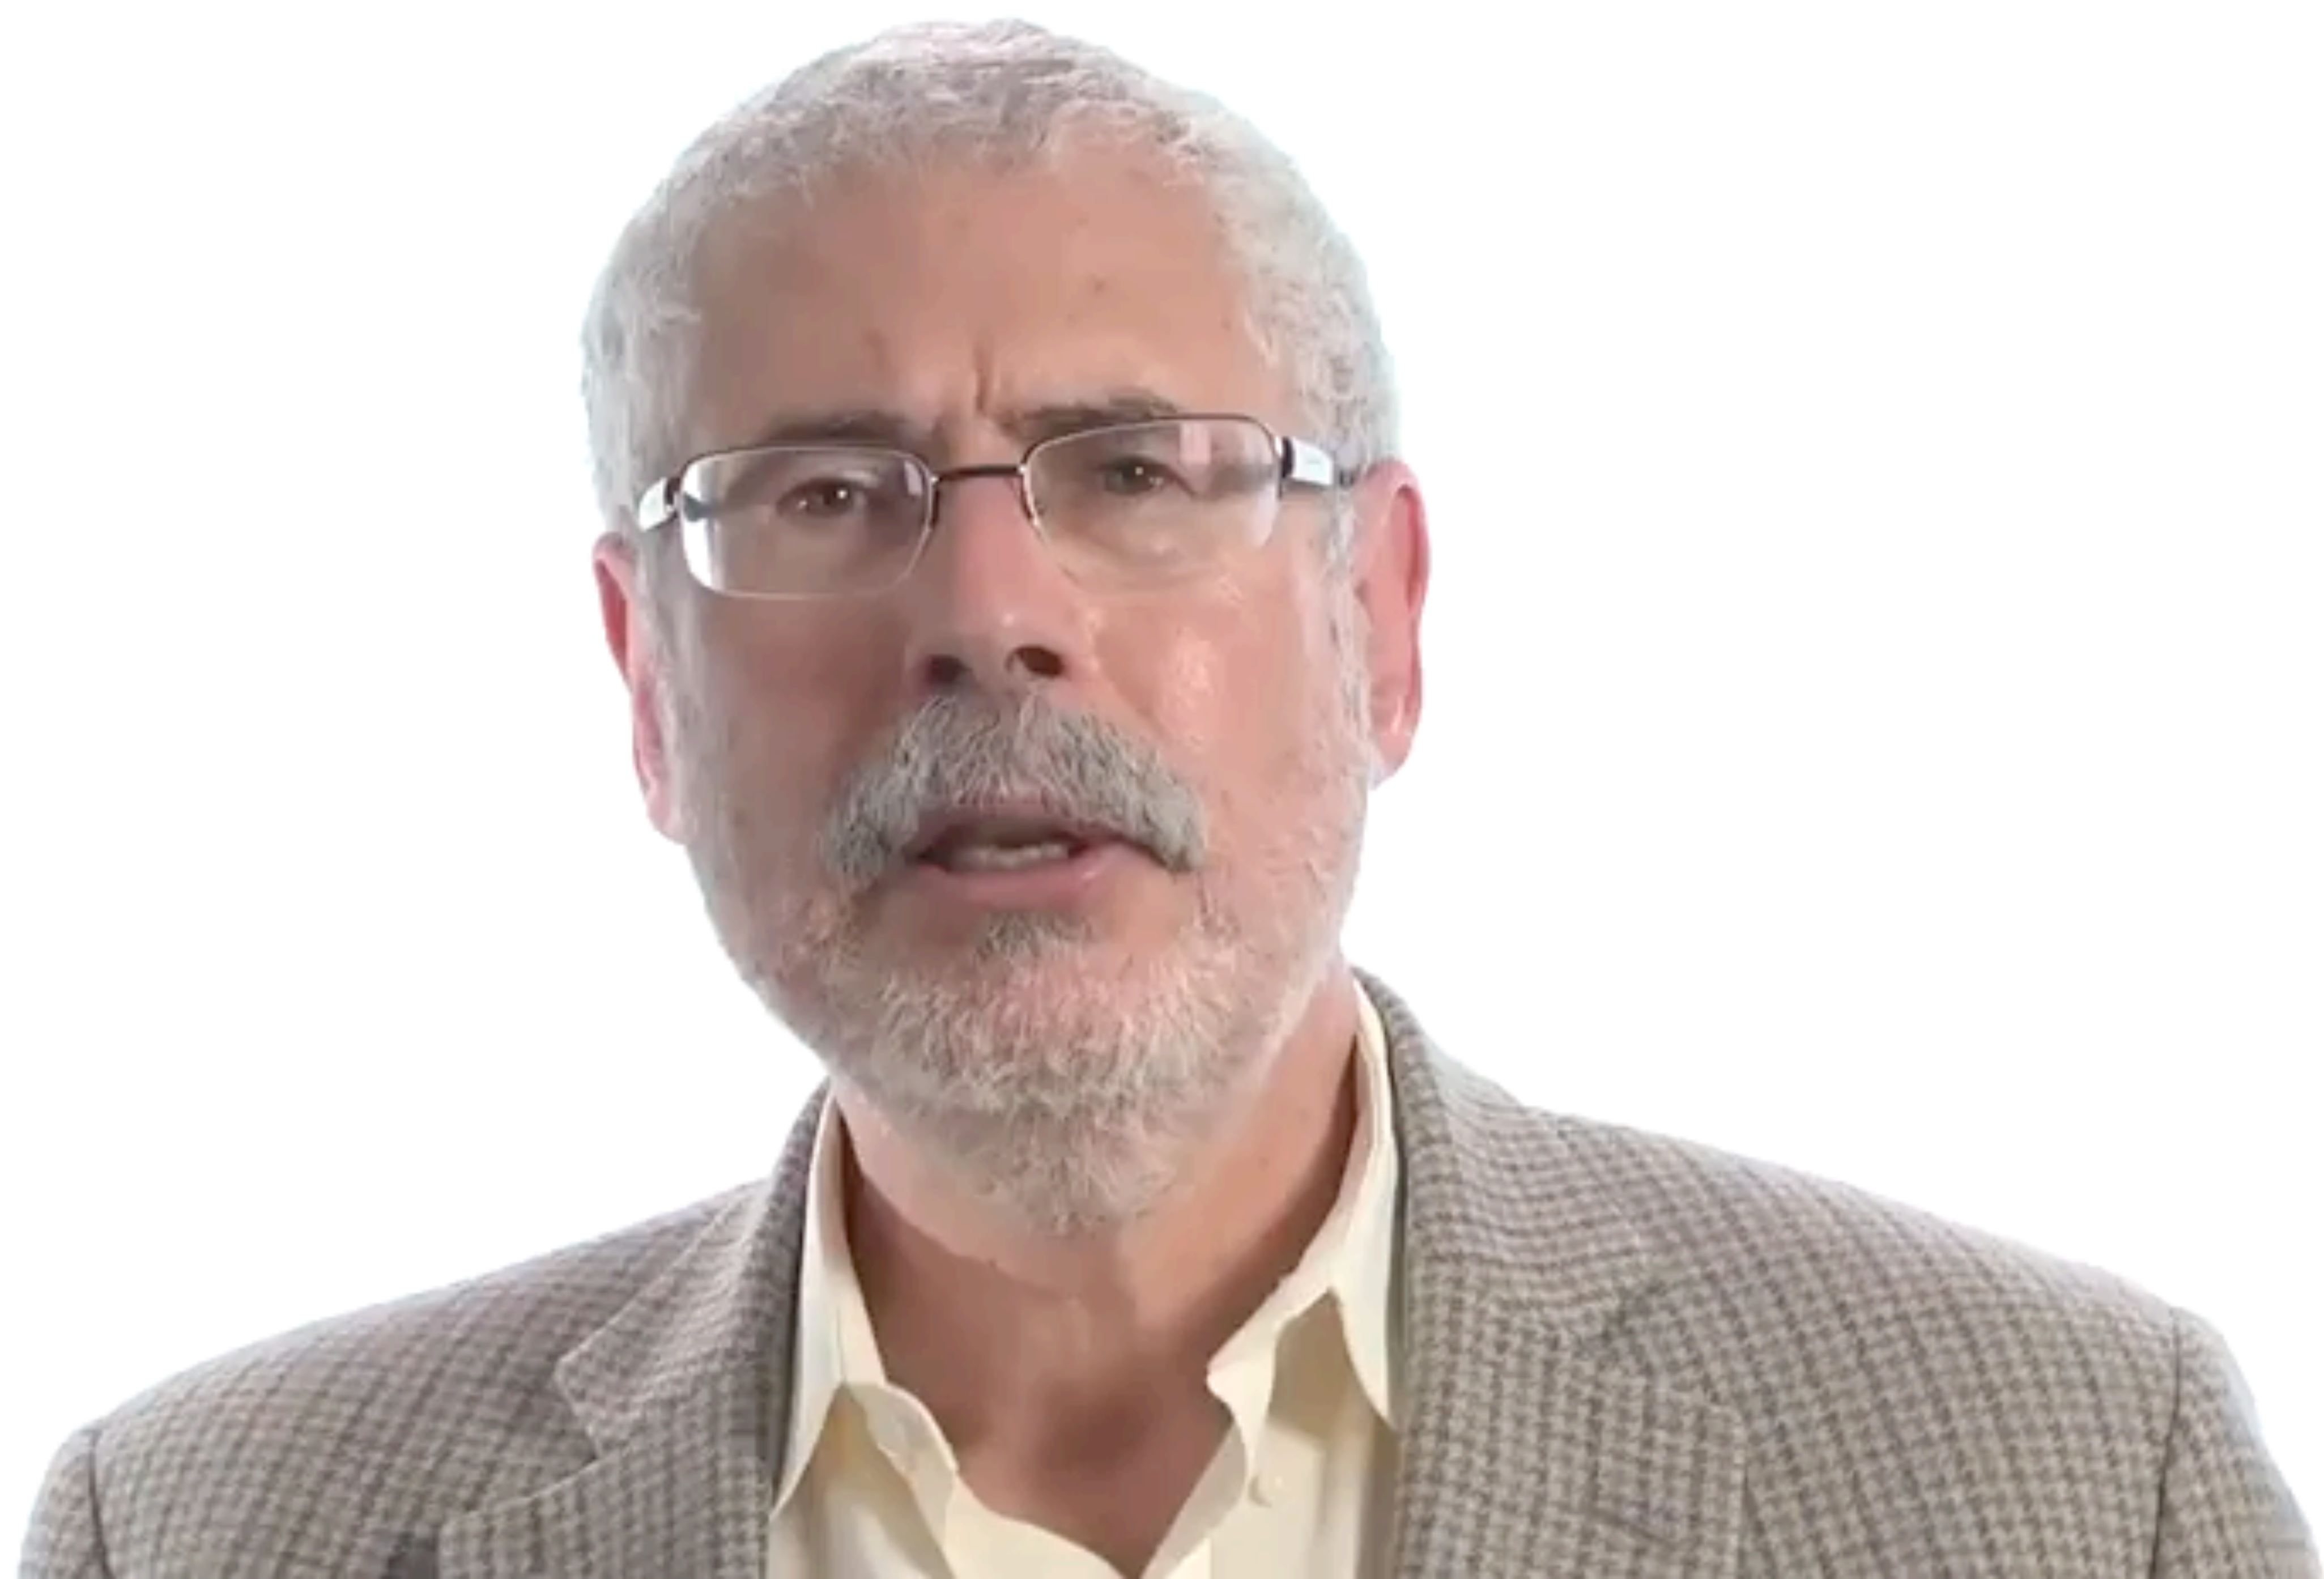

- Modelling tools to help understand a business, service or product
- They often relate to a particular business methodology
- As such, a range of popular canvases exist
  - Business Model Canvas
  - Lean Canvas
- We will focus on the Value Proposition canvas
  - Can reside at a sub-level of other canvases
  - Has the specific job of modelling Product market Fit

# Value Proposition

Value Proposition, by Steve Blank (view on YouTube)  
From the Free Course: How to Build a Startup

# Value Proposition

- What is it that you are building?
- Who are you building it for?
- What does it solve for them?
- What is the Minimum Viable Product to address this?

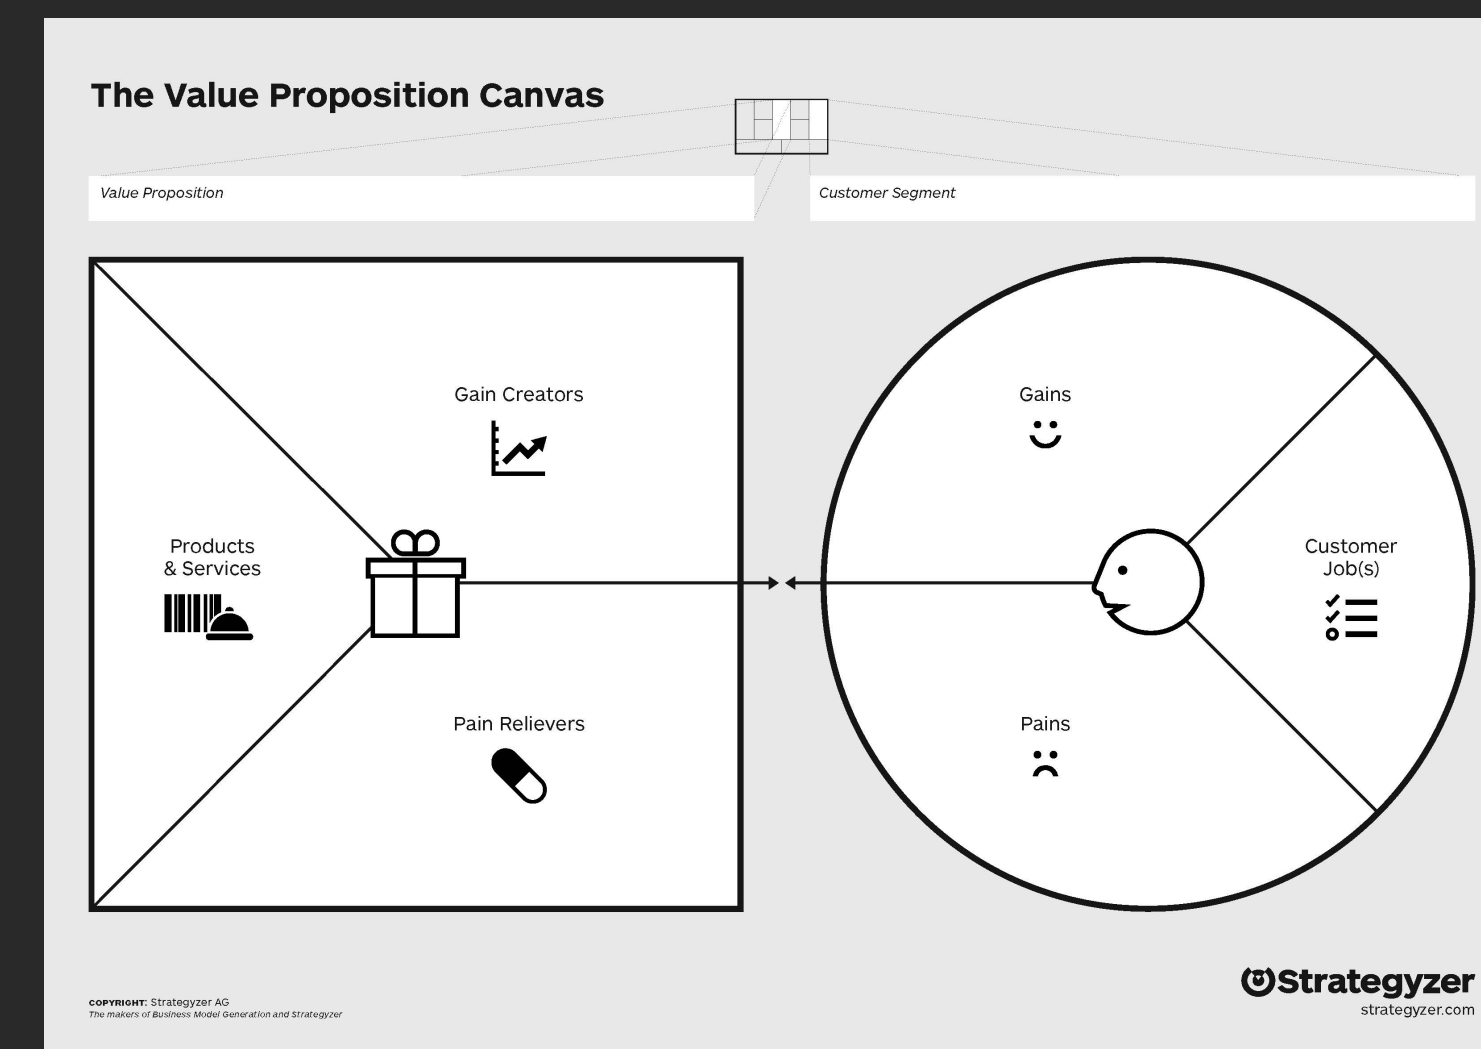

# Value Proposition Canvas

Find your fit

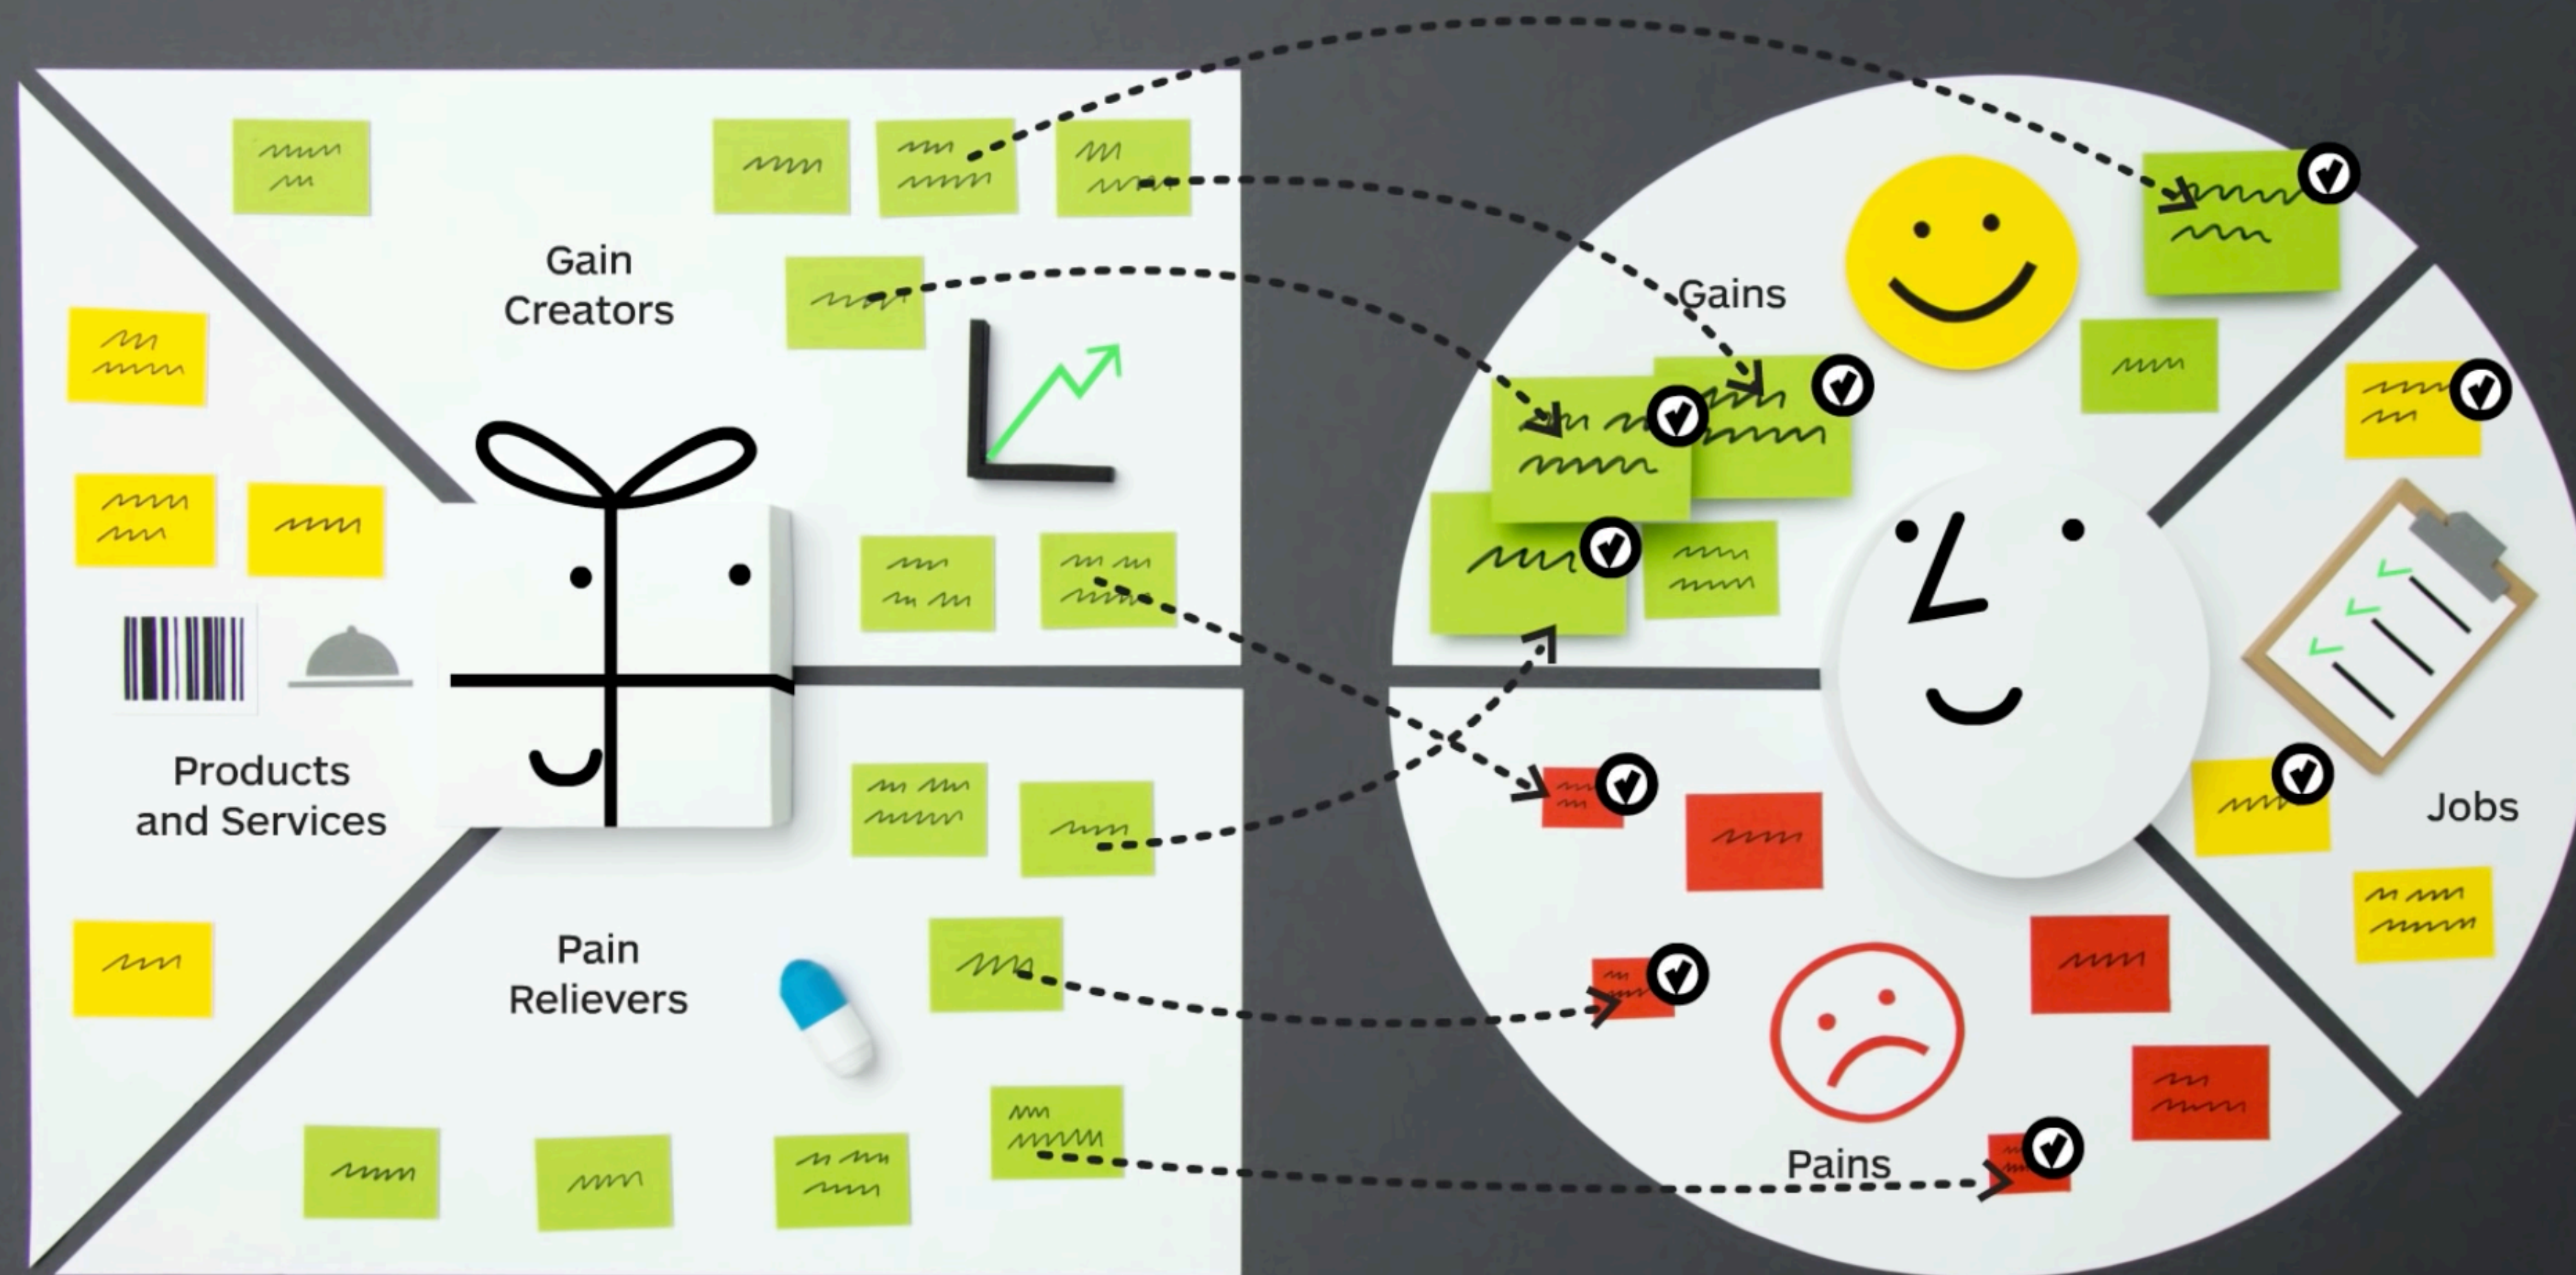

# Value Proposition Canvas

- Helps to profile customers
- Helps to map value
- Helps to develop Product Market Fit

# Value Proposition Canvas

Value Proposition Canvas, by Strategyzer (view on YouTube)

# Customer Profile

- Model understanding of the people you intend to create value for
  - Jobs
  - Pains
  - Gains
- Allows you to visualise, design and test your understanding

# Customer Jobs, Pains and Gains

- Jobs
  - Functional
  - Social
  - Emotional
- Pains
  - Negative Outcomes
  - Get in the way of performing jobs
- Gains
  - Positive outcome
  - How customer measure success

# Value Map

- Models your understanding of your value proposition
  - Product and Services
  - Pain Relievers
  - Gain Creators
- Allows you to Design, Test and Iterate

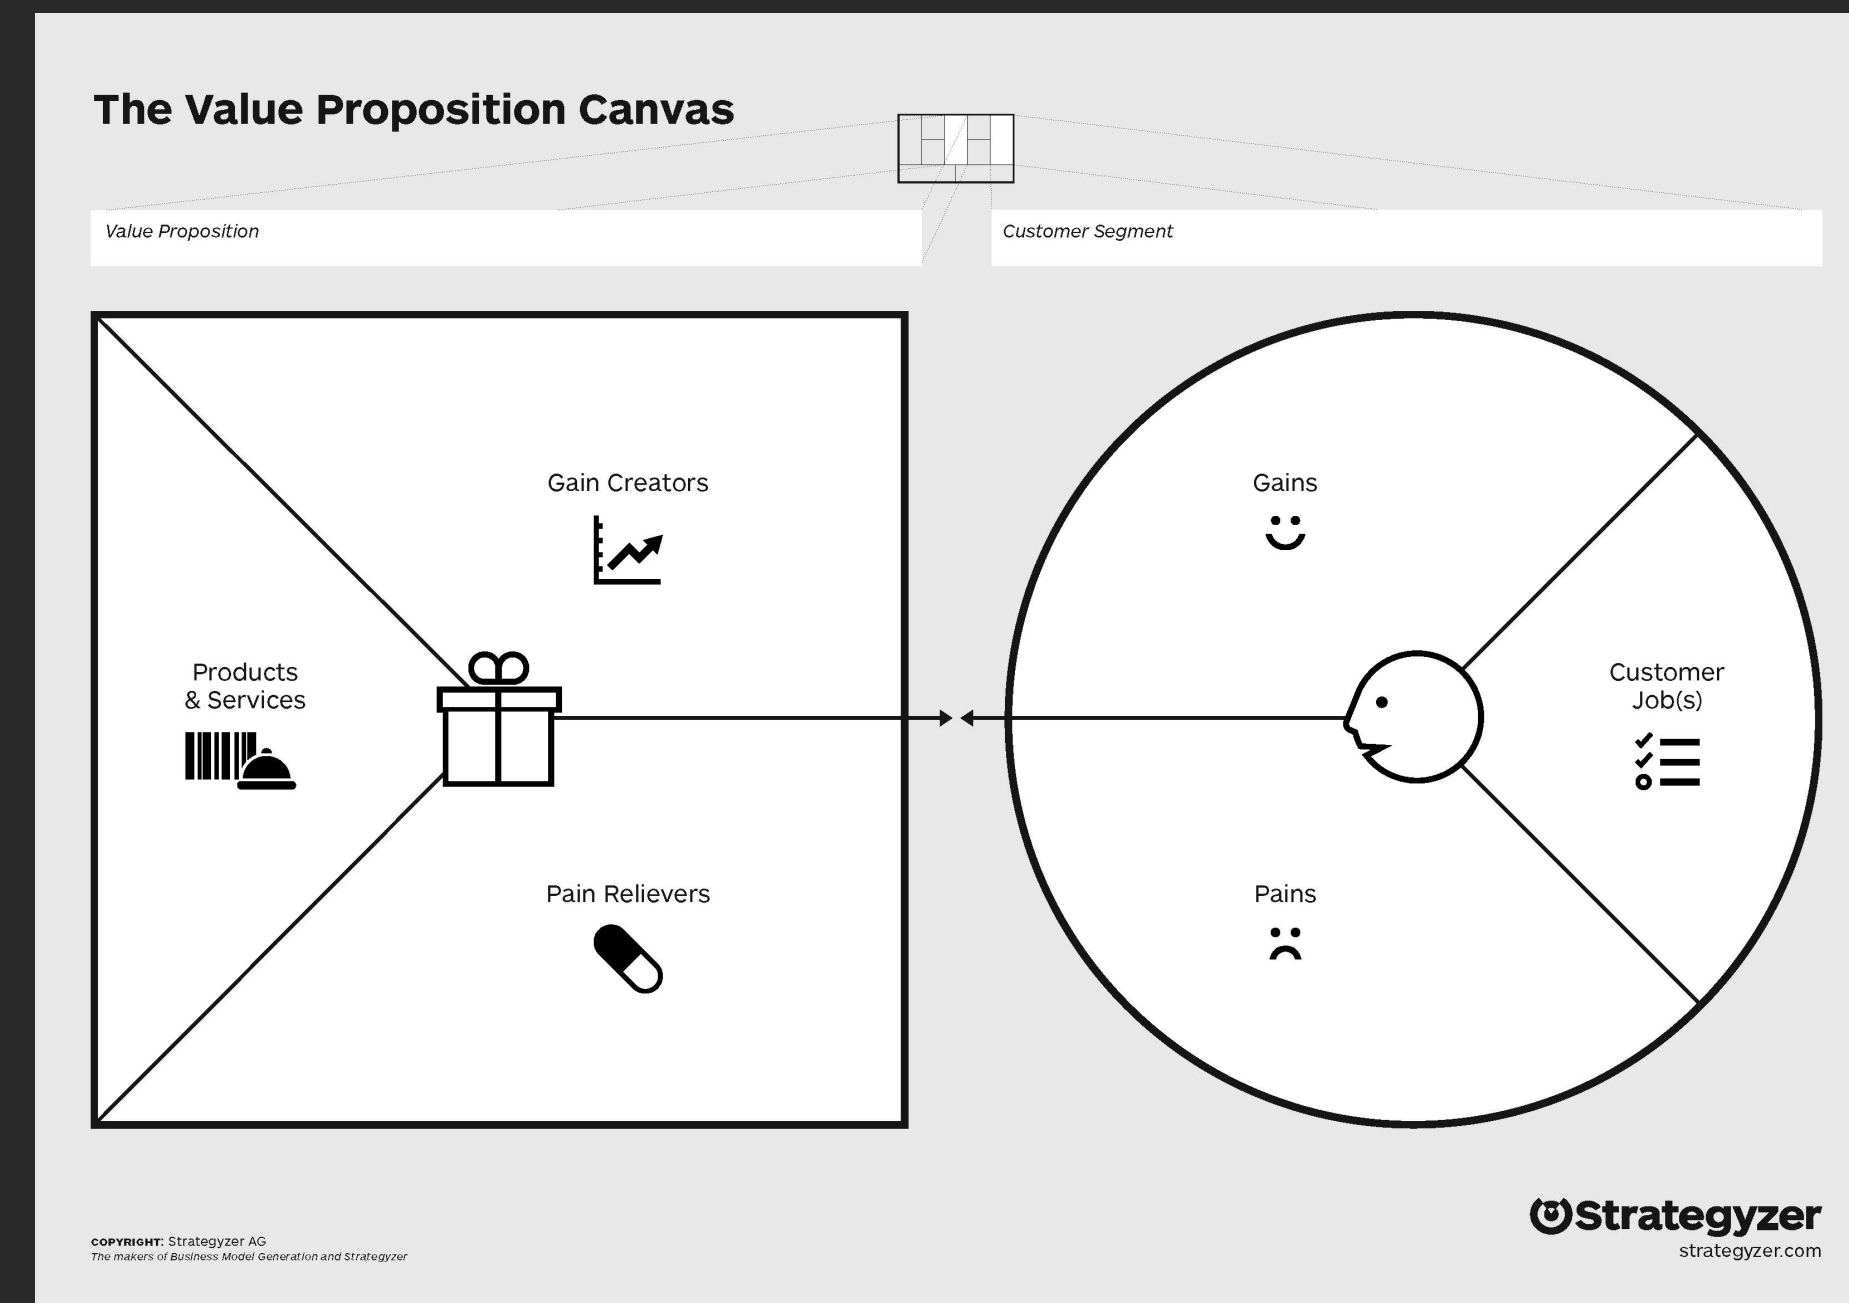

# Product, Pain Relievers and Gain Creators

- Product and Services
  - List the product and services your value proposition builds on
- Pain Relievers
  - How does your product and services make customer's life easier?
  - How do they Eliminate, reduce, remove pains they care about?
- Gain Creators
  - How do they produce, increase, maximise outcomes and benefits?
  - Gains customers expect, desire or would be surprised by?

# Product Market Fit

- Connection between customers and your product or services
  - How you ease customer pains
  - How you create customer gains
- Is what you are making
  - Needed
  - Wanted
  - Desired

# Good Value Proposition

- A good value proposition has Product Market Fit
  - Successfully targets essential customer Jobs, Pains and Gains
  - The Value Proposition canvas helps with this
- However, needs to reside within a good business model to succeed
  - The Business Model Canvas or Lean Canvas can help with that
  - However, that is not within the scope of this module

# Value Proposition

- What is it that you are building?
- Who are you building it for?
- What does it solve for them?
- What is the Minimum Viable Product to address this?
- You need to know these answers to prioritise your Product Backlog

Can you answer these questions yet?

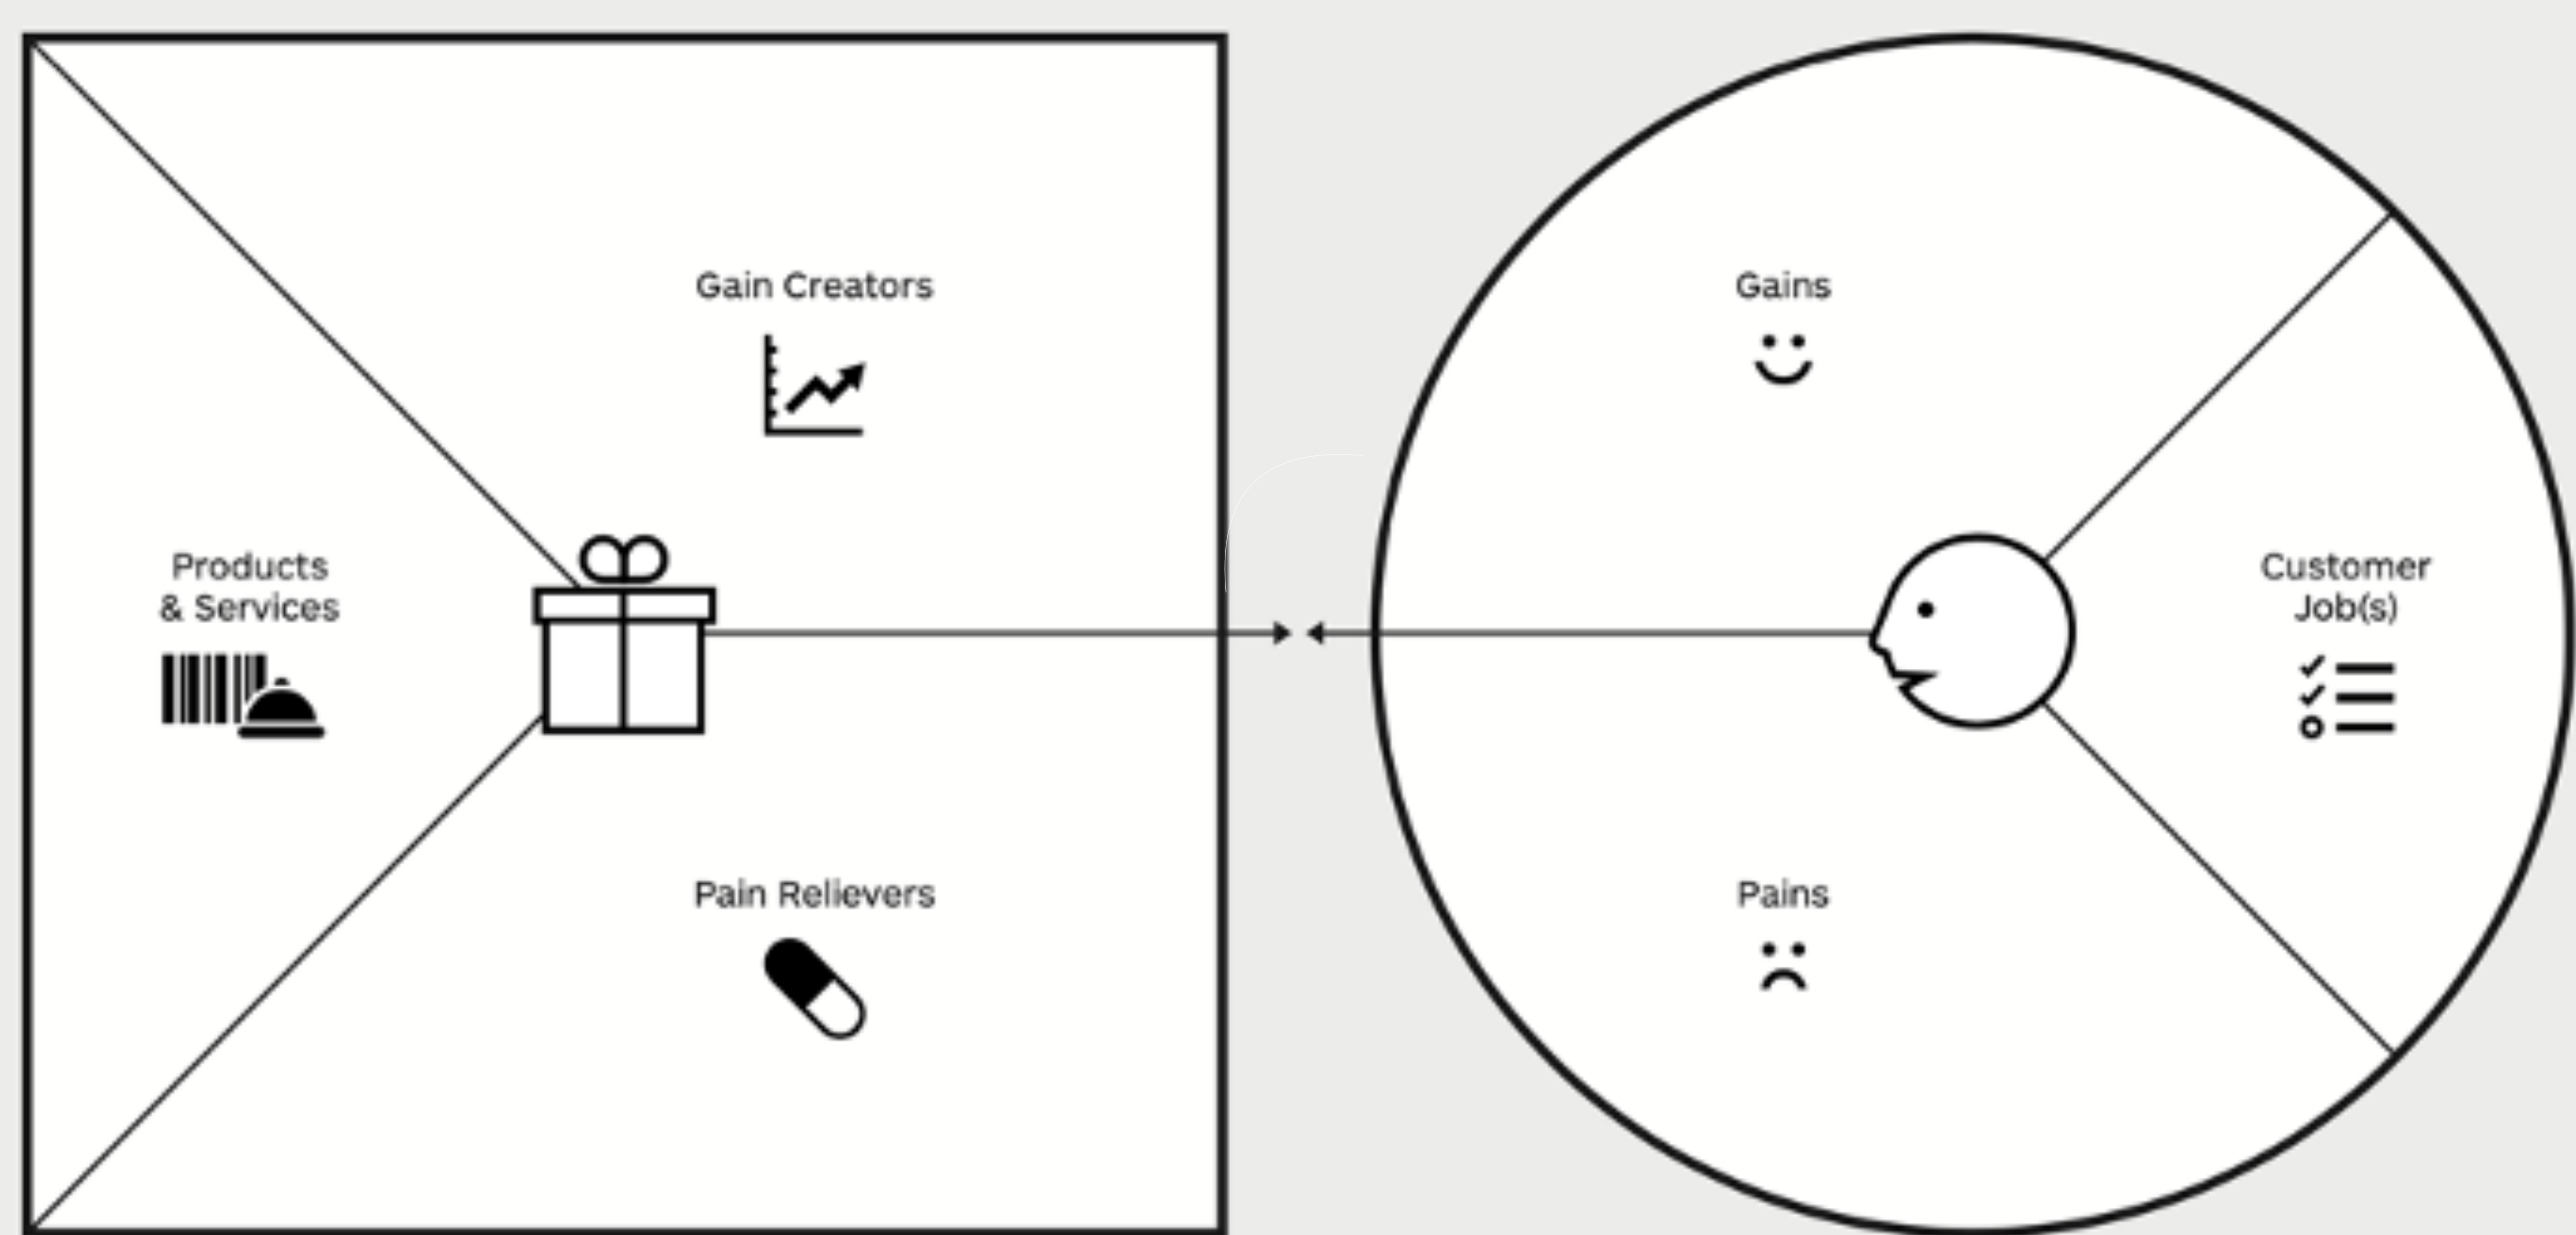

# VPC Example

Online book shop

# Value Proposition Canvas - Online Book Shop Example

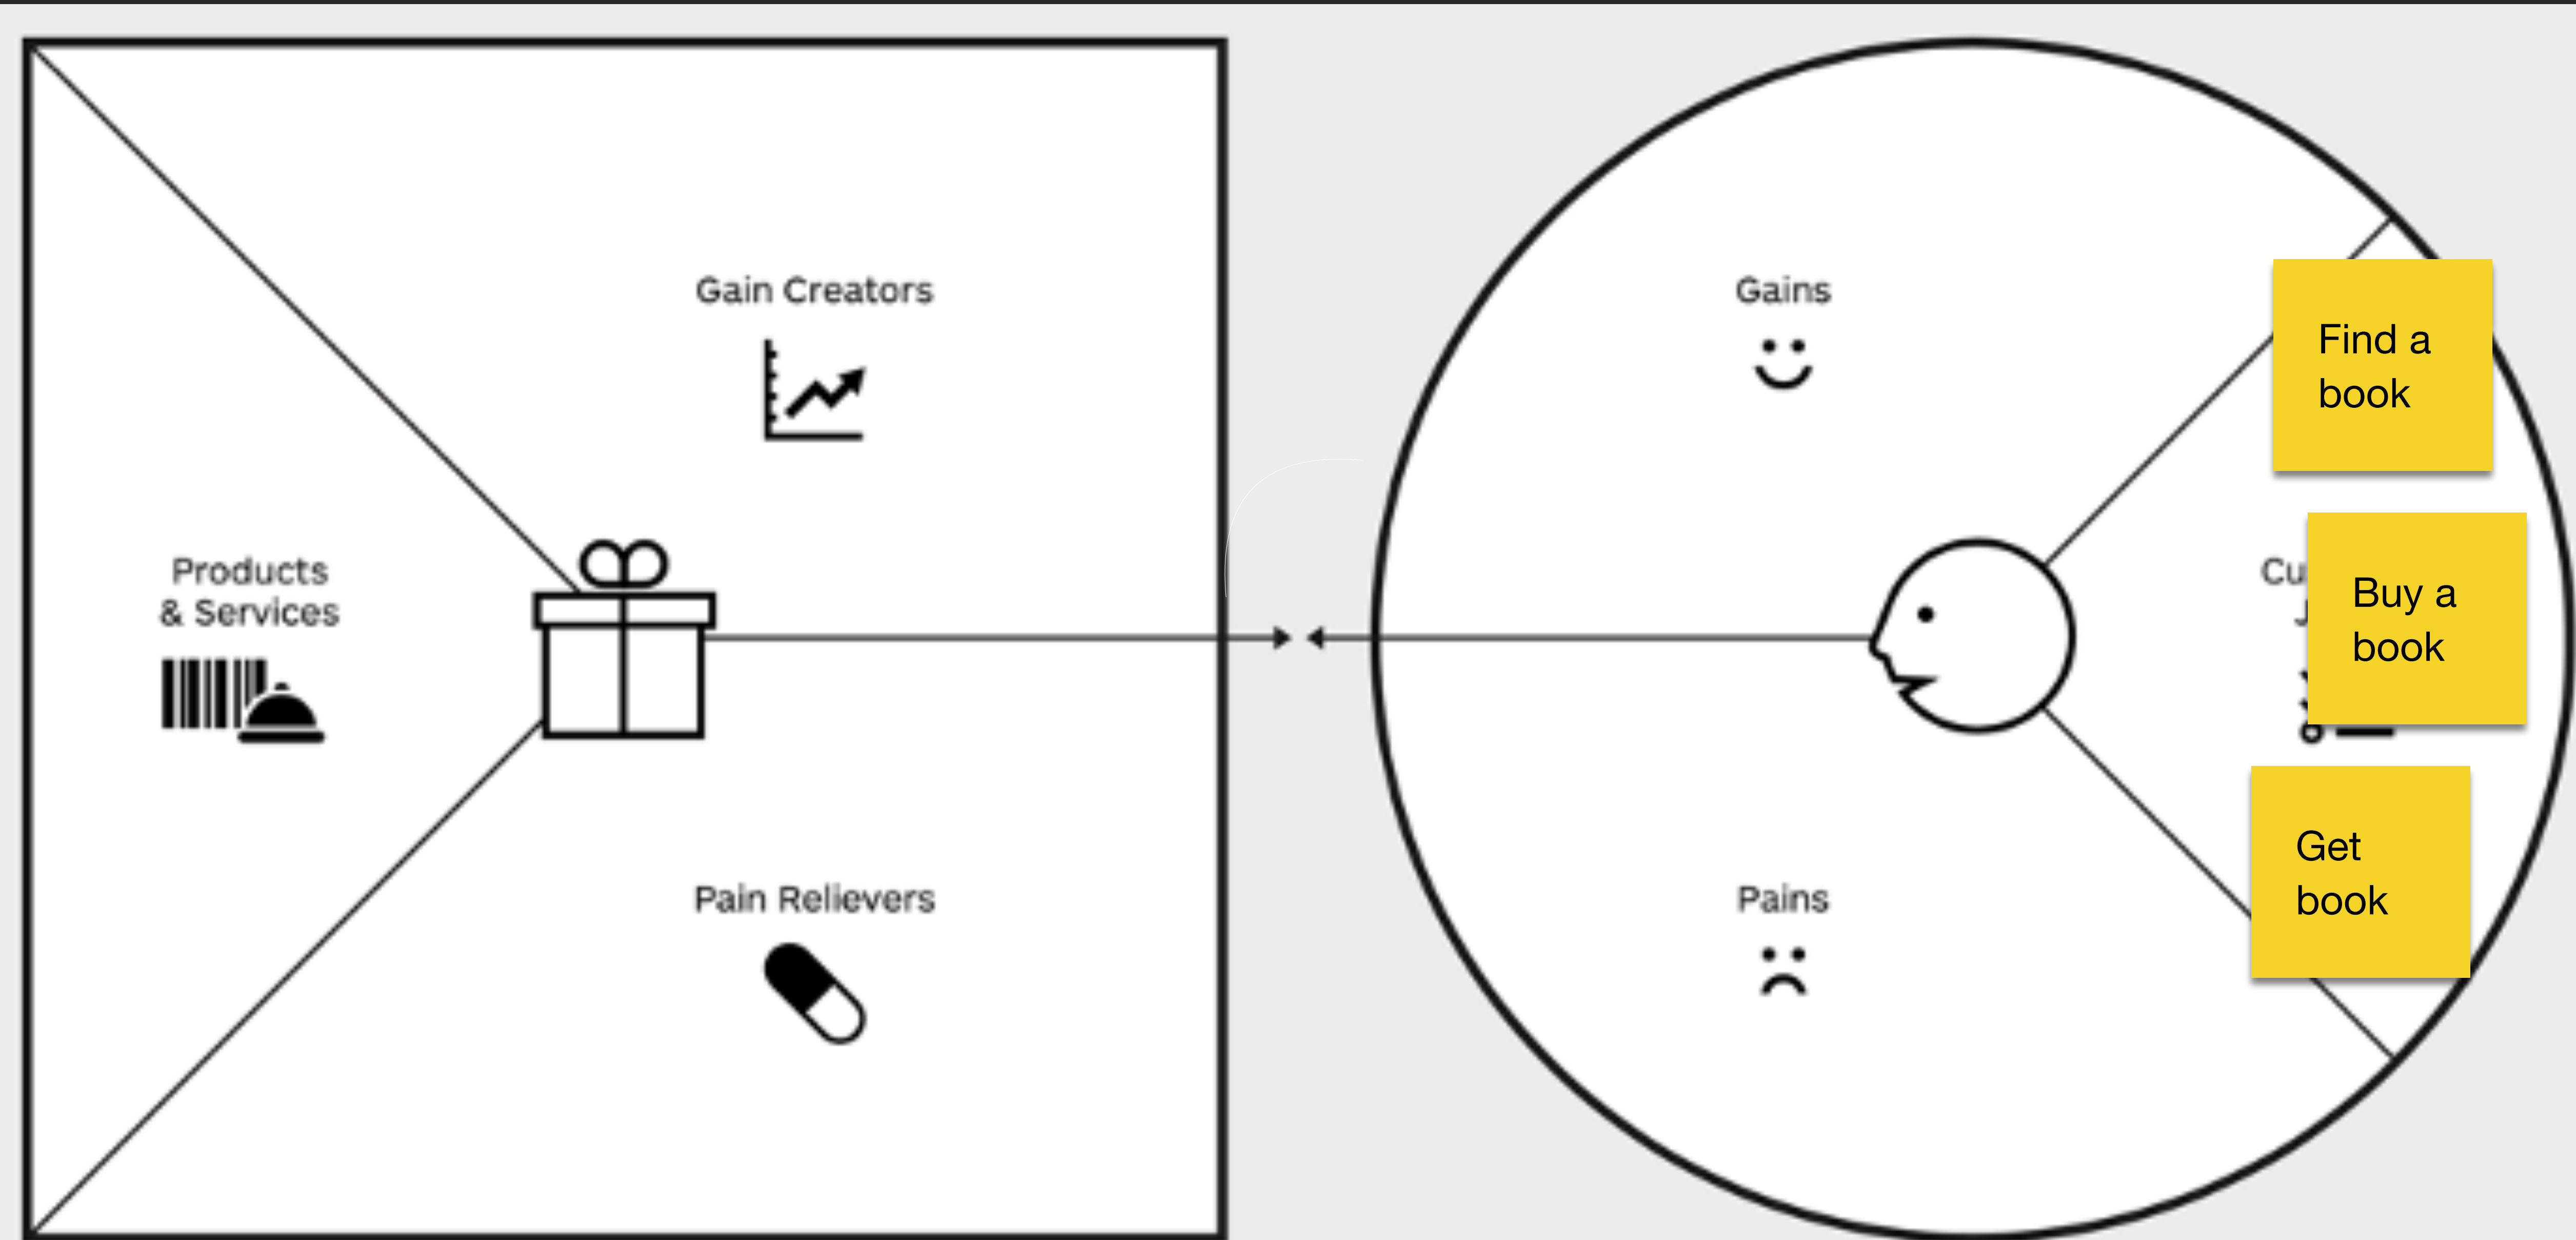

- VPC for online book shop service
- Customer segments considered
  - Person who want to buy a book (Customer)
  - Business that wants to set up an online book shop (Shop Owner)
- Note, the order of the steps shown here are not rigid
  - Order driven by how facts emerge during meetings and research
  - Order differs between creating or enhancing a product
  - Arrows are not required, included here to help explain the process
